

Maryland DOC Spill Kits for Disinfection and Disposal of Blood and
other Infectious Materials

*Bloodborne Pathogens Spill Kit

1. 1 pair latex gloves
2. 1 bottle of EPA approved disinfectant/absorbent
3. 1 small shovel and brush
4. 1 towel, 12" x 14"
5. 1 towelette
6. 1 hand wipe
7. 1 biohazard bag with twist tie
8. 1 pair goggles
9. 1 poly apron or full body suit
10. 1 surgical mask
11. 1 pair of shoe covers

* The warden or facility administrator shall determine the number and storage location of all spill kits and ensure that these supplies are readily available for disinfection and disposal of blood and other infectious materials. The location of all spill kits shall be listed in each institution's exposure control plan. In addition to spill kits all institutions shall have utility gloves, face shields, and sharps containers readily available as needed for spills of blood or other infectious materials.
